PROJECT PROFILE:

Project   **:** Simplification of Fundamo Project
Employer   : Visa Inc
Duration   : Jan/2016 to Feb/2017
Description   : The Project aim is to change complete tech stack of current FUNDAMO Project from Enterprise Edition to Open Source . Fundamo is a mobile money platform for aimed for unbanked countries.

Responsibilities :
1. Including in design discussions
2. Core member of development
3. SPOC for the project in local office
4. Handling deployments and maintain the servers.

  As a part of migration of the automation cases I have developed a Chrome plugin which generates the json representation of all the selected web elements of each page. The plugin reduces the human effort in creating **Page Object Modeling** for automation.

Project   : Global Restrictions Revamp
Duration   : Dec/2014 – Jan/2016
Description : The Project aim is to revamp the existing User's Limitation Resolution Exp to a dynamic and seamless experience . This project also provides a platform to the PayPal developers to add/remove limitations with almost **ZERO** coding . Thus provides time to marketing enourmously.

Responsiblities:

1.Expertised the development in NodeJS

2. Part of the Kraken- NodeJS Open Source Framework.
3. Agile Scrum Master for the Team.
4. Feature lead

Project : Secure Access Flow Experience(SAFE)
Duration : Sep/2013 to Oct/2014
Employer : PayPal India Chennai
Description : **SAFE** aims at providing a smoother and more secure experience for users whose accounts are compromised. There are around ~3.7 MM accounts placed globally which are compromised and this is one of the biggest pain-points for PayPal users. TH project was critical one, since it implies potential financial loss and compromise of personal data.

Responsibilities:
1.Creation of Test Plan and Test
cases. 2.Included in discussions of
API design.
3.Included in discussions from various DOMAIN Team
4.Functional testing and automation of end to end test
cases.
5.Debugging and Defect tracking in Functional and Nonfunctional use
cases 6.Lead for **Continuous Integration** of the project .
7. Functional **Code Coverage**

Project : Yahoo Email
Migration **Duration** : April/2013 to
July/2013 **Employer** :
PayPal India Chennai
Description : The Project provides a smooth experience for the users whose yahoo email id were deleted due to YAHOO EMAIL CLEANUP to change their PayPal Account Emails . The project was very critical and time bounded as it was addressing Yahoo .

Responsibilities:
1. Including in design discussions
2. Automation of functional cases.
3. Debugging and Defect tracking .
4. Support for Production and Live Log Level Testing

Project : Email Template Migration
Duration : Jan/2013 to Mar/2013
Employer : PayPal India Chennai
Description : The Project is aimed to change the email templating system which was more static content to a dynamic content template called eCAT.

 6. Live Testing and Production Support.

Project : Adaptive Payments System
Employer : PayPal India Chennai

Duration   : Sep/2012 to Jan/2013
Description   : The Project aim is to provide the customer to pre-approve the payments for

for a given number of days. This makes the customer and merchant to bypass the payments process multiple times .

As part of this project I have developed a php based web application which then added to the automation framework of PayPal .

Tools/Utilities:
1. Web Application to provide clear understanding of any webservices.
2. Web Application to create test data in millions with single click.
3. NodeJs Based Tool which provides internal calls/ services for any flow in PAYPAL.
4. Utility for creating and maintaining pages in confluence.
5. NodeJS Web Application for Code Competitions within Teams .

PAPERS PUBLISHED:

1. Published a paper titled "Comparison of Platforms and Browsers Using XSS Mitigations techniques" at International Journal of Computer Science and Information Technology & Security.

2.   Published a journal titled " Classification of Web Documents using LSI and Domain Ontology" at 3rd IEEE International Conference on Software Engineering and Service science 2012.
